AFFIDAVIT

This is to inform all interested parties that **MADERACRE S.A.C.** is a forestry company that manages natural tropical forests grown on land with forestry aptitude. We do not operate on peatlands. These lands have not been subject to human intervention in their creation, development, or production.

Additionally, we do not carry out plantations in these forests. Their use is based on a highly selective forest management system, with reduced impact and natural regeneration.

Sincerely,

MADERERA RIO ACRE S.A.C.
