PROFILE

Forest engineer with more than 20 years of experience in the management of tropical natural forests, is responsible for the management of one of the largest forest management units in Peru with more than 220 thousand hectares located in the south eastern Amazon, MF/CoC FSC certified operation since January 2007. As part of integrated forest management, it has implemented a REDD+ project since 2009, a project that holds CCB Gold and VCS accreditations. In 2019 he has managed to obtain the accreditation of ecosystem services of the FSC for conservation of diversity and carbon sequestration. These efforts have also helped position MADERACRE SAC, the company where it works, among the highest positions in the SPOTT ranking of sustainability and transparency worldwide.
